Matinee Wednesday Afternoon at 2 p.m.

BRITISH CAPITAL.

ISTS INTERESTED

The most important group of British financiers yet to be interested in Alberta oil fields visited the province last week, including Rt. Hon. Lord Southborough, Viscount Eldon, Hon. Byrnes Gilmour and Mr. W. S. Van Dyke, director of British Pacific Trust Securities. The party paid a visit to Alberta oil fields in company with Hon. R. G. Reid, minister of lands and mines and Hon. H. H. Greenfield, former Alberta Premier, and representatives of the group in Alberta.

Rev. G. R. T. Ayling, Baptist minister at Moncton, N.B., who disappeared about seven weeks ago, has been located, working on a farm in the Ingouish river district under an assumed name. For weeks Mounted Police had been searching the province, and country for him, recently crossing the Ingouish river. He was located by the police at Ammon, where he was busy planting turnips. For his master, Noble Horsman. As the police interrupted him, he gave the name of Hartien, but when they produced his photograph he admitted he was the missing clergyman.

SIMPLE METHOD DEvised FOR PREDICTING COKE QUALITY

What may prove of decided service to Canada's by-product coke industry and to the coal industry, is a method devised by fuel research engineers of the department of mines, Ottawa, for classifying coals in terms of the quality of coke they will produce commercially. A feature of the method, which is described in the recently published "Report of Investigations of Fuels and Fuel Testing, 1932", is its simplicity, consisting of a single laboratory test and the use of a chart and a table.

From the position of a given coal on a chart, the physical properties of the resultant by-product coke may be predicted with a fair degree of accuracy. By means of ordinary proximate analysis to determine what is known as "the specific volatile index", supplemented by special though simple swelling index tests, it is possible to examine quickly, and with little expense, a large number of coals or coal blends as to their comparative suitability for use in a by-product coke oven, without going to the expense of large-scale tests. On the coal or coals thus selected, full-size plant tests may then proceed to satisfy the coke producer that the predictions made are entirely satisfactory for the peculiar requirements of his plant and market. The engineers responsible for devising the method have had the opportunity of testing it and report that predictions so made have invariably been corroborated by the result of later full-scale tests.

The department's activities in respect to experimental work on the hydrogenation of Canadian coals, coal tars, and bitumen are featured in two sections of the report.

There are at present commercial developments of hydrogenation in other countries. In Germany motor fuel has been produced from crude petroleum, coal tar and lignite. In the United States lubricating oils are being refined from petroleum by a modification of the process, and in England a large plant is being erected for the production of gasoline from bituminous coal. It is at present necessary to protect the English and German industries with large tariff preferences, but with the depletion of the world's oil fields the industries should become economically self-supporting.

The work of the Canadian department of mines lies in testing the Canadian raw materials, so that when the time is economically ripe for the commercial development of some of these, information will be available concerning their relative amenability to hydrogenation. The first section of the report describes batch hydrogenation experiments on tar produced from bituminous coal from the Sydney area, Nova Scotia. The second section describes a continuous apparatus constructed at the Fuel Research Laboratories and gives results of tests in it on coal tar, bitumen and coal.

Copies of "Reports of Investigations of Fuels and Fuel Testing, 1932" may be obtained from the Director, Mines Branch, Department of Mines, Ottawa.

BROWNLEE'S RESIGNATION NOT AFFECTED BY JUDGMENT

Edmonton, July 4.—The judgment of acting Chief Justice W. C. Ives, dismissing the action of Miss Vivian MacMillan against Premier Brownlee, will not affect his decision to resign.

"So far as I know at present, it will not affect my decision," Brownlee stated when advised of the judgment. Mr. Brownlee made it clear that he is not resigning as a private member of the legislature. "If my successor wishes me to do so, I will; but until then I am not resigning," stated Brownlee.

Nanton school board plans to build a two-room addition to their school.

"ESKY'S"

Now that the rest of the country is getting a "new deal," I think the government should investigate and insure one for the Eskimos in our Alaskan territories.

This was the plea of Col. W. S. Van Dyke, director of Metro-Goldwyn-Mayer's Polar expedition which filmed "Eskimo," epic of the Arctic.

Van Dyke and the first unit of his hazardous expedition had come back to the studio to complete close-ups and interiors, bringing with them two families of Eskimo natives, actors in the production.

"Trading ships, I discovered, systematically victimize these people," declared Van Dyke. "I saw instances that amazed me. The natives are so used to it they don't protest, but I believe a protest is due."

The arrival of the Van Dyke expedition from the North was as dramatic as their perilous trek into the Polar regions itself. Relatives, friends of the technicians and of others in the party, screen celebrities and others gathered to greet them.

The first to greet Van Dyke was his mother, Mrs. Laura Van Dyke.

The first person "Pop" Arnold, the bearded "grip," greeted was a five-month-old son, born while he was in the Arctic and of whom he caught his first glimpse when Mrs. Arnold held the baby up on the station platform.

Landships and dangers never reported by the expedition's wireless came to light. Van Dyke had suffered pleurisy pneumonia on the trip and had lost it a secret from the outside world. Several of the men had narrow escapes from freezing never reported by the expedition.

Captain Peter Freuchen, author of the story, and guide and interpreter, had brought the Eskimos, including Carl Kameak and his family, Gaguk, Diansa and Buank, also Dortok, the "Garbo of the Arctic," little Upiak, the child actor in the picture, and Philip Nunorok, walrus hunter, and his son Romeo. These natives had never before seen the white man's civilization.

In all, the expedition travelled more than 12,000 miles, touching Cape Disbarre, Kotzebue Sound, Prince of Wales Island, Teller Island, Seward and other points. Frozen in aboard the Nanuk they covered locations with dog sleds and planes.

Mala, the Eskimo leading man in "Eskimo," was a famous hunter, which led to his accompanying Knut Rasmussen, the explorer, on his Arctic expedition. This taught the young native the use of the camera and he also learned English and Danish in the job. It was through it that Col. W. S. Van Dyke selected him to head the native cast in the new picture, filmed during a year's trip into the Far North.

SCAB PRINT SHOPS

Nearer home we find in the printing trade "scab" conditions, for The Journal quoted on a printing order the wholesale price of which for stock alone was \$19.00, the work, such as labor in composition, ruling, presswork and binding amounted to \$34.85, based on trade union prices prevailing in western Canada; yet a Calgary firm gave a quotation of \$22.00 on the job which a reputable Winnipeg firm of many years standing quoted at \$51.55.

Another job printing firm in Lethbridge is an offender when it comes to "making competitive bids," for instances are known where it has "scabbed," unmercifully in order to secure business from firms trying to maintain a fair wage scale. The remedy for these conditions lies largely in the hands of the public, in refusing to purchase from firms who do not pay living wages to those who produce the goods. Workers never will have purchasing power while they are exploited and their health and well-being is impaired by being denied a living wage.—Coleman Journal.

FIELD DAY A HUGE SUCCESS

From every standpoint, the eighth annual field day of the Blairmore Amateur Athletic Association on Monday was a success. The day opened dull, and for a while rain threatened, but towards noon a break gave promise of clearer weather, and from then on the weather men acted most favorably.

The programme commenced promptly at 9.30, but the attendance at that time was not large. In the afternoon fully two thousand were present to witness the various competitions, which included boys' and girls' foot races, jumps, dashes, shot-puts, bicycle race, football, baseball, softball and the 2½ and five-mile marathons for the Trono and Pinkney trophies, respectively. In the various contests, some provincial records were broken.

A full list of winners will appear in a later issue of The Enterprise.

Refreshment booths were operated on the grounds by the Ladies' Aid of the United Church and the Catholic Women's League. Both were well patronized.

At night, a grand dance was held in the Columbus hall, when the spacious building was packed to capacity.

The stampedes put on by the Indians on Sunday have drawn such a gallery of late that these affairs are getting out of control. As a result, the government officials must ask that no whites attend any future stampedes on the reserve, else they may be picked up by the police as trespassers on the reserve.—Gleichen Call.

BLAIRMORE UNITED CHURCH
Rev. Albert E. Larke, Minister

"Serve the Church that the Church May Serve You."

Services Sunday, July 8th, Rev. N. W. Whitmore, of Pincher Creek, in charge.

10 a.m.—JUNIOR SCHOOL
7.30 p.m.—PUBLIC WORSHIP.

Rev. A. S. Partington, B.A., Rector

Services Sunday, July 8th:
No Sunday school classes until further notice.
Evening service at 7.30 o'clock.

SCHOOL MUSICAL FESTIVALS

School musical and dramatic festivals, practically unknown a few years ago, have grown tremendously in the past few years in Alberta and have become an important influence on rural and city school life. This year more than 11,000 pupils over the province participated in these festivals compared with about 8,400 last year. This year something like 1,100 prizes were awarded, compared with 680 last year, and 571 classes were completed in against 453 last year.

SAFeway STORES

Our new policy of UNIFORMLY LOWER PRICES THROUGHOUT THE STORE is attracting widespread public approval! While others make extravagant claims and may sell a few items at a low price, SAFEWAY STORES offer you consistently better values, week in and week out.

Object-Lesson Of Peace

Whatever may be the individual reaction to customs houses as between Canada and the United States, there is general unanimity upon the world value of the lesson presented by the unique fact that not a gun nor a fort stands as provocation between the two countries throughout the whole extent of the international boundary.

This is a phenomenon a situation that has attracted universal attention, been the subject of thousands of after-dinner and more ceremonious addresses, and stands to-day in a belligerent world as a supreme example of what understanding and goodwill can do to preserve the peace of an immense borderline, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American peoples, and it is almost inconceivable that any set of factors could disturb the serenity of the relationship existing between the nations north and south of the boundary line.

That goodwill and understanding has been of almost inestimable benefit to Canada. Billions of dollars of American money have been invested in this country; hundreds of thousands of American people have come to settle in our midst. That money has helped materially in the development of Canada; those people have contributed their share to the upbuilding of the Dominion of the British Crown. Together they have helped to achieve that economic diversity upon which Canada has been able to build its economic fabric on a national scale. These facts are evidence of the confidence with which the people of the sister country view their neighbors to the north and testify to the keen appreciation they have of the solidarity of British Institutions and British forms of government.

The unique and signal character of this unfortified frontier, the amity between the two nations and the economic relations which seem to stand superior to trade rivalries, have attracted attention of the Carnegie Endowment for International Peace, which proposes now to make a special study of the factors lying behind a situation which stands as an impelling object-lesson to peoples of the globe.

Whether or not any definite conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The facts stand in their amazing isolation—peace, goodwill, and understanding are better weapons of defence than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too intangible to lend itself to any concrete definition or be written into any formula for use of peoples who, similarly situated, might be expected to follow the same lead.

Whatever the finding, the lesson stands for the world to view—an irrefutable proof of what two nations may do if they have the will to live in peace and amity, convincing evidence that, demonstrating their mutual goodwill by dispensing with the so-called weapons of the defence, neighbors may live in harmony without incurring those conditions of the mind or of the body politics, which lead to war.

Probe Working Of The Brain

Use High Radio Currents To Stop Functioning Of Limited Areas

How a University of California psychologist used high radio currents to stop the functioning of limited areas of the brain without interfering with the other parts, to study the purposes of particular centres of the brain, was described to the American Association for the Advancement of Science.

This somewhat startling method of probing the functional workings of the brain was based on the research of Dr. Clarence W. Brown of the university's psychology department. Dr. Brown suggested his method of brain study should prove serviceable in solving anatomical and psychological problems in which a small controlled elimination of function is desired.

Fixed Price For Tobacco Growers

Imperial Tobacco Company Of Canada Limited Signs Tobacco Growers' Agreement

Gray Miller, president of the Imperial Tobacco Company of Canada, Ltd., states that "The Ontario free cured tobacco growers are now practically assured for 1934 a price based on 27c per lb., for an average crop. Although we are still without any assurance that other manufacturers will follow our lead, we have now agreed to meet the request of the growers for a 27c average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 88 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Modern War Implements

Britain Installing Rapid Fire Gun In Fighting Planes

A big gun era begins in aerial warfare. A 37-millimeter, rapid fire, automatic gun is being installed in some of the larger fighting planes of Great Britain and promises to have a "tremendous advantage" over an opponent carrying only the ordinary machine guns.

The heavy gun shoots more slowly, sending out its messengers of death at the rate of only five in four minutes. But each shell weighs a pound and a half and is considered certain to disable any plane however slightly the contact is effected. And the slow-shooting heavy gun, thanks to its long range to give it victory over the hornets. The small, light plane with its sputtering machine gun is never to be permitted to come within effective range.

The report says: "Excellent results at both ground and air targets have been obtained at 2,000 yards." Presumably that gives British air fighters a fine start over all competitors in the armament race. But the presumption lingers before the announcement that the new device was developed by experts connected with one of the great armament manufacturers whose trade always has been international.

And even if the British government seizes complete control of that particular make, it can be certain that shortly after the usefulness of the invention has been demonstrated, arms makers of other nations will be out with guns for airplanes that can shoot shells just as big, just as far and perhaps just a little faster—Detroit News.

Praises Missionary Efforts

Doctor Credits Christianity With Great Progress In Asia

The change which Christianity worked in the conditions of millions of women, and the part which Christian women took in working these reforms was the theme of an address at Highgate, South Africa, by Dr. J. R. Most, president of the World Missionary Council, at a meeting of women workers of all Christian denominations.

The effect of Christian missions upon the lives of women would be sufficient evidence, he said, to convince him of the worth of foreign missions. An additional argument lay in the devotion and the achievements of Christian women in the missions.

To thousands of women in heathen lands the relief brought by the medical missions, the establishment of hospitals, and the creation of nursing services had been immense. Women took the lead and did the greater part of the work in this field of service. It might be said that Christian missions had created the medical profession throughout Asia.

Fortune Has String Attached

Man Must Marry By Christmas 1933 To Inherit

If John Francis Gallagher, of parts unknown, takes up his abode in Ottawa on or before Dec. 25, 1933, and settles down to home life he will receive \$100,000 from his aunt, Mrs. R. Zarah, 143 Well Hall Road, Eltham, London, Eng.

The offer of wealth was disclosed in a letter from Mrs. Zarah to Acting Mayor J. A. McKelcher of Winnipeg. She said she was obliged to make a public appeal as to her nephew's whereabouts because she had lost all trace of him several years ago.

Mrs. Zarah, in her letter, said the last address she had of her nephew was box 130, Carbon, Alta., and general delivery, Prince Albert, Sask. If Gallagher is not located and married by the date set, Mrs. Zarah said she would bequeath all her real and personal property to the church and charity.

Cost Of Farm Production

Dominion Agricultural Bulletin on prairie farm costs, says: A half-section grain farm in the prairie provinces when operated by one man and seven horses would be able to produce wheat at 79.5 cents per bushel, while, when operated with a 10 h.p. tractor and two horses, the cost would be increased to 85 cents per bushel.

Proved Idea Wrong

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daily artificial, or artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

Obligate plants are plants which can grow in but one life condition.

Synthetic Rubber

Automobile Tires Now Made In U.S. From New Substitute

The first American synthetic rubber automobile tires which look like real rubber and wear fully as well, were announced recently.

They were described as a potential checkmate against excessive rubber prices and a guarantee of American rubber independence in war-time. The synthetic rubber now costs about \$1 a pound, against 15 cents for foreign real rubber, which has ranged from five cents to more than a dollar.

The announcement was made jointly by the Dupont Company, makers of the synthetic rubber, and the Dayton Rubber Manufacturing Company, of Dayton, Ohio, making the tires.

The synthetic rubber is made of acetylene, salt and water. The acetylene comes from coal and limestone, so that all the ingredients are home produced. It was developed by J. A. MacMillan, president of the Dayton company, issued this statement:

"These tires have been subjected to rigid laboratory and road tests and have proved themselves fully the equal of tires built of natural rubber. They have been placed on automobiles opposite tires built of natural rubber and have been subjected to severe usage."

Use Of Radium

Dr. Shepley Deals With Advance Made In Use Of This Medium

"It is definitely recognized today that the scope of radiotherapeutic attack has so widened that it now embraces a very large per centage of the total cancer field," Dr. Earle E. Shepley, radiotherapist for the Saskatchewan cancer commission, of Saskatoon, told delegates to the Canadian Medical Association at Calgary. His paper dealt with the advances made in the use of radium as a therapeutic agent since its discovery in 1910.

"Because of late recognition," Dr. Shepley said, "a large per centage of cases of cancer cannot be considered from the viewpoint of curative attack. In those that have been given curative treatment procedures, possibly not more than one-third are cured. From these groups, a large number require palliative radiotherapy." This is a matter of importance because such procedure reduces suffering even if not effecting a cure, Dr. Shepley explained.

Will Regulate Tariffs

Dr. Shotwell Explains Powers Given To Roosevelt

Economic problems, including tariff questions, would be more smoothly adjusted between Canada and the United States as a result of the powers to regulate tariffs given to President Franklin D. Roosevelt, Dr. James T. Shotwell, former Canadian representative of the United States at the peace conference in 1913 and at present professor of history at Columbia University, New York city, told the Ottawa Canadian Club. Formerly the president was the prerogative of the United States congress.

Tariffs, under executive decree, would operate without the intrusion of political prejudices formerly seen, Dr. Shotwell said. His audience included Prime Minister R. B. Bennett, Sir Robert Borden, wartime premier and Rt. Hon. Mackenzie King, former prime minister and Liberal leader in the House of Commons.

Gold In Canada

Gold is found in every province of Canada except Prince Edward Island, and in point of value it ranks with coal as the two most important mineral products of the Dominion, states the Department of Mines, Ottawa.

"Minnow" submarines weighing only 12 tons and measuring 20 feet in length have been given successful undersea tests in Japan.

In English law, a bailiwick is the district within which a sheriff may exercise jurisdiction.

Improves cooking

Retains natural color of meats, vegetables and fish. Adds a touch of flavor. Makes cooking easier. Improves digestion. Makes food more palatable. Improves the flavor of all foods. Improves the flavor of all foods. Improves the flavor of all foods.

When you smoke plug tobacco, you can cut each pipeful fresh when you want it—and you can cut it any way you like, coarse or flaky. Plug tobacco is economical, too, for it lasts longer in your pipe.

DIXIE

PLUG SMOKING TOBACCO

Regular White Elephant

Automatic Gave Minister From India Lots Of Trouble

Rev. Elbert M. Moffatt, central treasurer of the Methodist Episcopal Church in India, was a sadly troubled man when he arrived from Europe on the liner American Trader, with a 45 calibre automatic revolver.

The automatic became a source of trouble to Mr. Moffatt before he left Bombay. The weapon was taken there by a bishop's sister, whose American friends felt she would need something to protect herself when she was so far from genteel Oklahoma.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The bishop's sister appealed to Mr. Moffatt to take the pistol back to the United States when he sailed.

He had it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him, which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declaration. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."

Mr. Moffatt threw up his hands. "I am," he said with determination, "taking it to the nearest police station."

A Miracle Of Speed

Nineteen Girls In London Factory Make Shirt In Minute

Those who refuse to believe that a shirt with all its stitching, trimming, button-holing, and so forth, can be made in one minute, should go to a building in London, and see nineteen girls, seated at nineteen tables, separated into two blocks, by a moving conveyor, performing this miracle of speed. Each girl performs one operation. "One sews cuffs, another makes collars, another button-holes. All the time shirts in various stages of completion are moving with the conveyor from one table to another. At full pressure the minute can be reduced, it is said, to fifty-five seconds!"

Gift For British Admiralty

Charles Courtney, master locksmith, arrived in London from the United States and said he would present to the Admiralty certain rings and articles of wearing apparel belonging to the late Lord Kitchener. Courtney said he salvaged the articles from H.M.S. Hampshire, the ship which carried Lord Kitchener to his death while on an official mission during the war.

Husband Needed Sympathy

In granting a divorce to a talkative woman at Toledo, Ohio, Judge James Austin explained that it was given "as a favor to her husband." Mrs. Northert V. Mueller could not be stopped by judges, attorneys or bailiff after she began a recital of her domestic affairs. The husband did not contest the action.

Population Of India

Showed Increase Of Thirty-Four Million In Ten Years

Dr. J. H. Hutton, C.I.E., I.C.S., chief commissioner for the census of 1931, in his census report wrote that for long China was considered to hold the greatest aggregate of human beings in the world more or less under the same administration, but India's population now even exceeds the latest estimate of the population of China. The difference between the kind of government China has had during the present century and the kind of government that India has had could not be better illustrated.

The census of 1931 gave India a population of 333 millions or an increase since 1921 of just under 34 millions. The increase in the ten years from 1921 to 1931 is almost equal to the total population of France or Italy and much greater than that of important European powers like Poland and Spain. If there was an increase of 34 millions between 1921 and 1931, a similar or even greater increase between 1931 and 1941, bringing India's population almost up to the 400 million mark which is envisaged by Sir John Megaw, cannot be dismissed as impossible—Calcutta Statement.

Kept Old Appointment

Friends Meet In Denver On Schedule After Twenty Years

Three men entered the office of a Denver newspaper promptly at 11 o'clock on a recent morning to keep a rendezvous made 20 years ago. The trio consisted of Earl E. Anderson of Los Angeles, California, H. H. Bromley of Denver and F. A. Donk of Rocky Ford, Colorado.

They explained that one night in 1914, while all were living in Denver, they made an appointment to meet in that particular building a score of years later.

PROPOSALS MADE FOR CHANGES IN ELECTION ACT

Ottawa.—Support to the suggestion that persons not voting should be struck from the voters' list was given by Hon. Charles Stewart, Liberal representative from Edmonton West, in discussion of the Election Act.

Hon. Hugh Guthrie, chairman of the special committee, after discussing amendments, stated one remaining for consideration was "the point is if a person does not vote should he be struck off the voters' list?"

"I am in favor of that," said Mr. Stewart. "Anything that would place a responsibility on the voter to record his ballot should be provided, he held. Both Mr. Guthrie and Hon. Ernest Lapointe concurred. The provision was approved at a second meeting of the special committee. In amended form, the act respecting the election of members and the new franchise bill, likewise with alterations, will be reported to the commons.

Closing its deliberations, the committee heard brief suggestions for the proportional representation system of voting and the transferable vote.

As sponsor for proportional representation, William Irvine (U.F.A., Wetsakwin) agreed he would bring the subject before the commons. It was decided unanimously the special committee would not go into the merits of the proposal.

The transferable vote would require "much attention" before it could be brought into operation, Hon. Hugh Guthrie and Hon. Ernest Lapointe, former minister of justice, concurred.

A proposal a clause be inserted to cover absentee voters was made by A. W. Neil (Ind.-Comm.-Alberta). It was decided Mr. Neil should draft a provision for consideration of the commons. The proposed clause, it was agreed, should cover fishermen, lumbermen, miners, prospectors and sailors more than 50 miles from their constituency. The amendment to be placed before the commons contemplates allowing the voters to mission after that, body accepted the resignation of Mr. Newton. The resignation, tendered on June 13, was accepted with regret by the commission just one hour after discussion of the situation arising out of a charge of assault laid against the former chief by Joseph O. Erickson, watchmaker.

It was stated the resignation was accepted with no other motive than the chief's desire to retire. He will receive a pension.

Chief Constable Resigns

C. H. Newton, Head Of Winnipeg Police Force, Retires After Long Service

Winnipeg.—Chris H. Newton, chief constable of the Winnipeg city police for the past 15 years, has resigned, and the reins with which he had guided law guardians of the city were in the hands of George Smith, chief of detectives.

Mr. Smith was appointed acting chief by the Winnipeg police commission after that body accepted the resignation of Mr. Newton. The resignation, tendered on June 13, was accepted with regret by the commission just one hour after discussion of the situation arising out of a charge of assault laid against the former chief by Joseph O. Erickson, watchmaker.

It was stated the resignation was accepted with no other motive than the chief's desire to retire. He will receive a pension.

Mr. Newton, president of the Manitoba Criminals' Association and prominent executive of the Chief Constables' Association of Canada, joined the Winnipeg police force in 1901 as a patrolman. His superior education and general ability brought him rapid promotion, until in 1919 he was appointed to the chief constable's post.

Defeat Divorce Bill

Ottawa.—The Stollard divorce bill will not receive further consideration by the House of Commons this session. A motion by E. R. E. Chevrier, Liberal member for Ottawa, to have the bill which was defeated in the private bills committee, referred to the order paper, was declared lost. By the bill, Hyman Stollard, of Montreal, sought to obtain a divorce from his wife, Ruth Rudnikoff Stollard.

W. N. U. 2053.

New Franchise Act

R.C. Doukhobors Will Be Debarred From Voting
Ottawa.—Rapid progress was made on the new franchise act as the committee of the house considering the bill approved without division three amendments at a second sitting under the chairmanship of Hon. Hugh Guthrie, minister of justice.

Doukhobors in British Columbia, where they are disqualified from voting in provincial elections under the British Columbia law, will not have the right to vote in Dominion elections under one amendment.

A second amendment struck out the provisions for a signed application by a prospective voter insofar as the original basic list is concerned. The provision for the future will continue to apply to the annual revisions of the list.

A third amendment dealt with the appointment of enumerators in each riding. It provided one enumerator should be nominated by the sitting member of parliament for the constituency. The second enumerator will be nominated by the nearest opponent to the successful candidate in the last general elections.

A. W. Neil (Ind.-Comm.-Alberta) appeared to ask that provision be made for the taking of the census vote as under the British Columbia Elections Act.

Boys Start On Tour

Famous Kittling Band Will Sail From Montreal For England

Vancouver.—Canada's champion junior band, the Kittling Band, of Vancouver, has left here en route for a two-months tour of England before returning home. At least one of the 45 youthful musicians plans to remain in the Old Country if his hopes are realized.

Norman Pearson, tall, fair-haired, 18-year-old trombonist, who, besides winning many awards for his music has established himself as one of the Dominion's foremost cricketers, will attend to realize his ambition when he reaches England—to play in first class county cricket there.

Pearson, despite his youth, has compiled a record in two months of play this season that is believed unequalled in Dominion record books. During that time he knocked up five centuries, passed the two-century mark once, and scored a total of 1,083 runs. His high score was 221 runs. And to make his record more remarkable, three scheduled games were rained out.

Concerts are being given en route at all the larger cities on the prairies and in eastern Canada.

The party will sail for England from Montreal on the Duchess of Athol.

Casualties At Rodeo

London.—The score of Tex Austin's rodeo to date is five contestants injured and one steer allegedly terrified. Rusty Coram, famous bronco buster of Camargo, Okla., suffered a broken leg when a bucking horse fell on him. He was taken to a hospital, the fifth cowboy injured since the rodeo began two weeks ago.

Loan For Winnipeg

Winnipeg.—Premier John Bracken announces arrangements have been made by the Manitoba government to loan the city of Winnipeg \$1,300,000 to cover the city's cost of unemployment relief during 1933. The loan was made possible by the Manitoba government borrowing from the Dominion government.

Trade With Great Britain

Toronto.—"We intend to establish close trade relationship with Great Britain and all other countries," Hon. Henry T. Rainey, speaker of the house of representatives of the United States, declared here.

Farm Debt Adjustment

Senate Frowns On Bill And Carries Amendment
Ottawa.—Provision in the government's farm debt adjustment legislation whereby a mortgage costing a farmer in excess of seven per cent may be liquidated on payment of the principal and three months' interest unless the mortgagee desires to continue it at a rate of five per cent, was frowned upon by the senate banking and commerce committee.

It was held this would make it impossible for farmers to secure mortgages. An amendment was carried unanimously making it possible for the mortgagee to hold his contract, when so challenged, by reducing the rate to seven per cent.

The committee proposed only one other amendment. A provision that would allow the governor-in-council to appoint an official receiver only in such counties as would be deemed necessary and expedient.

The bill was reported for third reading as amended.

JAPANESE MOB MAKE ATTACK ON BRITISH POLICE

Shanghai.—An angry crowd of 300 Japanese attacked British police before dawn, hurling bricks, bottles and clubs at them.

The affair threatened to precipitate an international incident. The British authorities had sought to arrest two Japanese sailors ashore in international territory.

The Japanese, styling themselves "patriots", objected to a Briton undertaking to arrest one of their countrymen and quickly assumed an ugly mood. Mistakes began to fly. Japanese naval shore patrols and British police reinforcements quickly ended the affair, which for a time threatened to assume proportions of an armed clash.

High Japanese naval authorities and British international settlement police officers finally intervened to prevent a pitched battle, although numerous British policemen were struck by bricks and other weapons hurled by the Japanese.

The British police, who attempted the original arrest, claimed that two Japanese sailors struck a Chinese woman, making it necessary to take them into custody.

Japanese naval representatives insisted the police of Shanghai had no authority to arrest Japanese sailors. Police refused to accept the Japanese attitude, pointing out other nations maintaining naval or military forces here recognized police authority on shore. They pointed out that when called upon to handle any service man, they immediately hand him over to his own command following the arrest.

Takes Tea With Queen Mary

Mother Of President Of United States Entertained At Buckingham

London.—Two of the world's most talked about women—Queen Mary and Mrs. Sandro Delano Roosevelt—sipped tea together in Her Majesty's private apartments at Buckingham Palace.

King George was present, but most of the animated conversation was carried on by Her Majesty and the mother of the United States president.

Just two mothers—grandmothers in fact—they found many common interests as they chatted. Their majesties were impressed by the gaiety, friendliness and frankness of Mrs. Roosevelt.

MAY COME TO CANADA

The health of Premier Ramsay MacDonald is the chief concern of the people of the Mother Country at the present time, as his physicians demand that he take a rest. Mr. MacDonald must take at least three months' rest, and it is thought he may make a trip across Canada.

Relief Cheques

Payment Of Dominion's One-Third Proportion Is Authorized

Ottawa.—Cheques for varying amounts from less than \$100—\$337,231 as the Dominion's one-third proportion of provincial relief operations, were authorized by orders-in-council tabled in the House of Commons. The amounts authorized included:

Alberta—\$77,681.
British Columbia—\$207.
Manitoba—\$3,672.
Saskatchewan—\$64,614, municipal and direct relief expenditures under 1933 act, to be credited to the \$500,000 loan made by the Dominion to Saskatchewan, November 24, 1933. For provincial works under 1933 act—\$1,066. Municipal direct relief under 1933 act—\$93,920. Municipal direct relief under the 1933 act—\$780, to be credited to the Dominion's loan of \$500,000 to Saskatchewan, dated January 6, 1934.

Investigation To Continue

Probe Into Price Spreads Will Be Carried On

Ottawa.—The price spreads and mass buying probe will be continued during the summer, it has been learned definitely.

The committee of 11 members of parliament conducting an inquiry since the middle of February is expected to be turned into a commission to continue the investigation. In a brief report being prepared for tabling in the House of Commons, this recommendation is likely to be made in the present report.

Practically all the sittings of the commission will be held in Ottawa, although there is a possibility the body may visit the maritime provinces late in August to hear evidence on the fishing industry on the Atlantic.

Tax Will Be Collected

Ottawa.—Provisions for the collection of five per cent. income tax from private trusts set up in Canada for the benefit of non-residents were placed in the amendments to the Income War Tax Act which were finally passed through the House of Commons. All clauses in the income tax measure had been passed previously but some question arose over the taxation of these private trusts.

To Visit Dominion

Reported That Ramsay MacDonald Will Holiday In Rocky Mountains

London.—The Daily Herald states that Prime Minister Ramsay MacDonald has "practically decided" to spend his long vacation from official duties in Canada, including in a walking trip through the Rockies.

A projected trip up the Amazon river in Brazil was rejected, the Daily Herald said, on account of the intense heat. Friends of the prime minister looked with disfavor upon his suggestion of spending the three-months health-seeking vacation in Newfoundland.

Internal politics in Newfoundland might worry the work-worn premier, it was feared. The newspaper reported that a long sea cruise was rejected on the grounds Mr. MacDonald would spend much of his time reading. He has suffered a great deal from eye strain during the last few years.

The visit to the Canadian west was finally proposed as affording the best possible rest for the premier. It was not stated who would accompany Mr. MacDonald but his daughter Isabel was believed almost certain to go with him. She has accompanied her father on all his trips away from England.

High Price For Telephone

Mukden, Manchuria.—Telephones are so scarce and hard to get in Mukden, because of the growth of the city, that fabulous prices are being paid for telephones being requisitioned by established subscribers. A Japanese building contractor has just paid the record price for a telephone connection—1,250 yen. This is equal to nearly \$400 in Canadian money.

May Reduce Radio Licenses

Toronto.—The Globe, in a special despatch from its Ottawa correspondent, said it understood proposals were before the special House of Commons commission on radio that might result in a reduction in the license fee for receiving set owners from \$2 to \$1.50 or \$1.

STATE OWNED BANK MOTION MEETS DEFEAT

Ottawa.—Liberals and Progressives made one more attempt in the House of Commons to gain public ownership for the new Central Bank but an effort of parliamentary rule failed. Speaker George Black ruled three motions out of order, declined to receive a fourth and when the house rose had another under consideration.

Hon. Ian Mackenzie, Liberal member for Vancouver Centre, moved the original motion—to refer the bank bill back to committee with instructions to consider a Central Bank owned or controlled by the Dominion or both owned and controlled by the state. The speaker agreed with Premier R. B. Bennett this was too ambiguous and was upheld by the house 98-72 with Conservatives pitting their strength against Liberals and Progressives.

William Irvine (U.F.A., Wetsakwin), a few minutes before, moved to send the bill back with definite instructions to recast the bank from a private to a publicly-owned institution.

When the Mackenzie motion was ruled out, the Irvine motion went out as well.

For a few seconds the house was in confusion, with nothing before the chair except the motion for third reading. Pierre Cagnan, chief Liberal whip, and George Coote (U.F.A., Macleod) both stood up together. The Liberals secured the speaker's eye and moved still another motion for public ownership but it met the same fate as the others. The United Farmer, apparently disheartened, took his seat.

J. S. Woodsworth, C.F. leader, then another task proposing a motion to refer back the bill with instructions to the committee to "safeguard the sovereignty of parliament over Canada's financial policies." The glowing hour precluded judgment from the speaker. Premier R. B. Bennett led the fight against public ownership, painting a picture of a Central Bank dominated by political control and patronage. The government, he said, had drafted every precaution against outside pressure and "we believe we have placed on the statute books of this country as good, if not better, legislation than any other country in the world."

BRITAIN WILL NOT PAY WAR DEBT TO U.S. IN GOODS

Washington.—A British reply that Great Britain was not prepared to make partial payment of its debt in goods and services was received by the state department without comment.

The formal note, delivered to the state department by D. G. Osborne, charge d'affaires, rejected overtures made by Secretary Cordell Hull in a note of June 12.

The British note said the experience of German reparations had shown that transfer of goods was as unsettling to world economic affairs as transfers in cash and could not be entertained by Great Britain.

The British note emphasized that the primary question for settlement was not what should be paid but in administration circles that declaration was considered as making clear that Great Britain had notified this country, in effect, that it would make no payment of any kind until the present debt funding agreement had been revised and hissed that the Secretary Hull's note of June 12, after setting forth the American position in opposition to British reasons for failing to pay on June 1, explained that Great Britain had never made any suggestions for payment in kind and that such payments might open an avenue for settlements.

The text of the British debt note follows: After careful consideration of the note which you addressed to Sir Ronald Lindsay on June 12, His Majesty's government in the United Kingdom feels there are two questions to which it may be useful to make further reference.

In the first place, His Majesty's government would observe that in their note of June 4 they did not state payment of the British war debt was legally contingent upon payment of the debts due to them. What they said was that it would be impossible for them to contemplate a situation in which they would be called on to honor in full their war obligations to others, while continuing to suspend all demands for payment of the war obligations due to them. This was a statement not of law but of fact.

Secondly, as regards the suggested payments in kind, His Majesty's government would recall that the experience of German reparations showed that transfer difficulties are solved by a system of deliveries in kind. As the committee, presided over by General Dawes, pointed out in 1924: "In their financial effect, deliveries in kind are not really distinguishable from cash payment."

In fact, economic objections to cash payments would apply with equal force to deliveries in kind, unless those deliveries were to consist of indigenous products of the debtor country (excluding re-exports) and unless they were to be accepted by the creditor country and consumed by it in addition to the goods taken from the debtor country in the normal course of trade.

If the United Kingdom were not to receive payment for goods exported on commercial accounts, her exports in those commodities available to purchase cotton and other goods from America would be still further diminished. Therefore, while not unwilling to give further consideration to possibilities in this direction, His Majesty's government do not at the present see any method of putting such a plan into practice which would be likely to commend itself to the government of the United States of America.

In the view of His Majesty's government, the primary question for settlement is the amount that should be paid, having regard to all the circumstances of the debt.

They regret that up to the present it has not been possible to make further progress in this matter but they were welcome to the opportunity of resuming discussion whenever it may appear that present abnormal conditions have so far passed away as to offer favorable prospects for a settlement. They are always anxious to remove from the sphere of controversy all or any matters which might disturb the harmonious relations between the two countries.

Awarded Scholarship

Toronto.—Toronto University Alumni Federation has awarded Canadian graduate in home science and faculty medicine valued at \$250 to Bertram James Woods of Lemberg, Sask.

Ten were killed and more than 50 wounded when machine guns opened fire on a political parade of students in Havana, Cuba. This unusual picture shows the actual fighting shortly after the battle broke out. No. 1 designates the nest of machine gunners and the haven of some of the wounded. No. 2 is a man slain in the street. No. 3 shows some of the paraders who have taken refuge behind a lamp post and are returning the fire of the attackers with their pistols. The cameraman risked his life to get this picture.

LIBERAL ASCENDANCY

The Liberal party has left the Valley of Humiliation and has ascended Mount Nebel, from whence the Promised Land can be viewed. In fact, incursions have been made into the said promised land, the two most recent being supplied by the political turn-overs in Saskatchewan and Ontario. All that is necessary now to make the picture complete from a Liberal viewpoint, is for the federal government to be overthrown. This would be tantamount to the falling down of the walls of Jericho.

The Dominion of Canada is in the throes of a decisive turn towards Liberalism. Various explanations have been advanced for this trend, notably the discontent and unrest throughout the country through five years of heartrending depression, the accumulation of governmental debt, the persistency of taxes and the desires for a change. Under democratic government, the votes of the majority rule and no one can seriously quarrel with the verdict. People of British stock are firm adherents to democracy. It is the best system of government for free peoples that has yet been devised. A Mussolini or a Hitler may regiment their people, restricting liberties and laying down the way their subjects may live and breathe in iron-clad regulations. Such methods of government are not for the British people. They want to rule themselves.

In Latin-American countries the elected rulers soon become dictators and use every available method to assure their continuance in office. Armed revolution is the only way many of them can become unseated. This means bloodshed and disturbance.

The democratic way is the best way. When people get tired of a government they simply vote it out and put in a new one. Of course no one expects the promises of the new government to be conscientiously fulfilled, but it is a new government at least and for a while they use the new broom vigorously.

Ontario went strongly Liberal after that party had wandered in the wilderness for nearly thirty years. It was time the Liberals had their turn in the banner province. In Saskatchewan the Liberal party won an overwhelming victory. It is remarkable, however, that the Conservative party, with a vote of over 100,000, did not elect a single member of the Legislature. A weakness is obvious there. It would be overcome by the transferable vote.

The C.C.F. failed to make any great impression on either Saskatchewan or Ontario. They polled a comparatively heavy vote, but were rather signally unsuccessful in electing candidates. This party shows more strength than the old line parties care to admit, but it will be an long way to go before it will be an effective force in Canadian politics. —The Hanna Herald.

A jury verdict in the Brownlee-MacMillan seduction case awarded Vivian MacMillan damages to the extent of \$10,000, and \$5,000 to her father. Judge Ives' decision, however, reversed matters, the case being dismissed by him.

Sunday, June the 24th, was the 437th anniversary of the discovery of Newfoundland by John Cabot. It is recorded that on June 24th, 1497, John Cabot, in the little ship Matthew, after 53 days' voyage over the north Atlantic, first visited the "New Isle," for which he was awarded a grant of ten pounds.

INTERESTING RESOLUTIONS SUBMITTED TO RECENT SESSION OF PARLIAMENT

(Continued from last week)

Now that we are an independent nation, we feel it beneath our dignity that appeals should be taken to the Court of a sister nation, known as His Majesty's Privy Council of Great Britain, sitting at London, and call your attention to a resolution of our National Council adopted and adhered to for many years. It was originally drawn by the late Mr. Justice Stuart, of the Court of Appeals of Alberta:

Be It Resolved that, in the opinion of this National Council, the time has arrived in the national development of our native land when the present system of taking legal appeals to the Privy Council in London should be abolished, and that our reasons for this opinion are as follows:

1. It is essential to full recognition of the equal national status of Canada, as so frequently referred to by British and Canadian statesmen, that this nation should possess and maintain a final court of appeal of its own, just the same as is done by Great Britain, France, Belgium, Sweden, Peru, Paraguay, the United States of America, and all the other nations, large and small, with which Canada is so alleged to enjoy equality of status.

2. The absence of such a final court of appeal in Canada, based upon the statutes of our own Parliament, is a tacit recognition, not only of a constitutional and legal, but of an intellectual inferiority, which inevitably has an injurious effect upon the mentality of Canadian youth, because it is a continual reminder of their subordinate national position.

3. While it may have been, and doubtless was, to the advantage of Canada in the earlier stages of the confederation, to have an able external tribunal to decide upon the interpretation of our new constitution, this condition no longer exists and at present and for the future an intimate knowledge of Canadian conditions, in connection with the acknowledged impartiality of our Canadian judges, is and will be a greater advantage than mere external impartiality, without any greater ability and without such intimate knowledge of our local conditions.

4. Appeals to the Privy Council in London are extremely expensive and give an advantage to wealthy litigants, which is extremely undesirable in the interests of justice to the poor and weaker.

5. The abolition of appeals to the Privy Council in London will undoubtedly have an effect exactly contrary to that feared in many quarters, in that it will really strengthen and not weaken the cordiality of the relations between Canadian and the British nations.

Signed on behalf of the National Council of the Native Sons of Canada this 9th day of December, 1933.

Geo. J. Smith, national president; I. Oscar L. Boulanger, 1st. past national president; J. M. Morrison, national 1st vice-pres; Silvest Lavery, national 2nd vice-pres; G. W. Burkholtzer, national historian; C. M. Baker, national treasurer; Frank G. J. McDonagh, national secretary.

MUNICIPAL ROAD GRANTS

Allocations of government grants to municipalities and improvement districts throughout the province, for road work purposes, have been made, it is stated by Hon. O. L. McPherson, minister of public works, and each district is being notified of the amount available for its season's requirements. This is the first issue of grants to municipalities for three years, no such grants having been paid in 1932 or 1933. The total appropriation this year, as voted by the legislature, was \$200,000, which has been allocated on a basis of population, mileage of roads and construction costs.

In Pennsylvania a man has the privilege of marrying his grandmother.

Canadian Soldier Contracts Unknown Malady During War. Suffers Untold Agony for Ten Years, Regains Health as if by Miracle.

Snowshoe, B.C.—J. Hurwig, one of the overseas soldiers during the war, who has been ailing since he was brought back from Europe after the war, has regained his health. It is said that he has been a war prisoner, and in the camps of the enemy he has contracted a malady which puzzled a good many physicians, who were unable to locate his trouble. However, the other day a physician from Germany looked him over, and at a glance he diagnosed the ex-soldier's trouble. Having spent six years among the German war prisoners, his practiced eyes immediately caught what other physicians could not see. Then he explained to his colleagues that in the great havoc very little attention was paid to the cooking of even the German soldiers, let alone the prisoners. So it came about that, often the prisoners received almost uncooked pork dinners. Consequently, very many of them contracted tapeworms, and it is very hard to tell tapeworms, and it may linger in the body for years before the right discovery is made. Thus Hurwig is a new man today.

Thousands of men, women and children sufferers are treated for many other maladies, when their real trouble is that monster, the tapeworm. The sure signs of it are the passing of the particles of the parasite. Digestive signs are loss of appetite with occasional greenness, coated tongue, heartburn, pain in back, limbs, and legs, dizziness, headaches, feeling faint with an empty stomach, emaciated, dark rings under the eyes. The stomach feels heavy, bloated, at times a crawling sensation from stomach into bowels is noticeable. Again, as if something moving towards the throat is felt. The patient has yellow skin, loses weight, has bad breath, spits constantly, absolutely aimless, no desire to work, always lazy. Epileptic fits are known to have been caused by these monsters, which sometimes grow over 50 feet. When it crawls into the windpipe it is liable to suffocate its victim. Get rid of this monster at once, before it undermines your health beyond help. Send \$5.00 for a treatment of Laxtan if you want to be rid of this horrible parasite. Laxtan is harmless, even if you have a worm.

Sold only by the U.S. Laboratory, 1011 U.S. Bldg., Box 2000, Hollywood, Calif. Not sold in drug stores. State age and sex. Laxtan is made up for you especially and it cannot be sent C.O.D., therefore, the remittance must accompany the order. To insure package add 25c extra. Guaranteed. (Cut this out and put it away, it may come in very handy some day. Show it to your sick friend and he may forget to thank you for helping him out.)

NEW TOWN PLANNING BOARD

A new advisory town and rural planning board has been set up by the provincial government to take the place of the former board, which was made up of representatives from various parts of the province. Hon. O. L. McPherson, minister of public works, is chairman of the new board, and with him are C. A. Davidson, P. N. Johnson and W. S. Gray, K.C. Mr. Davidson, who is the provincial commissioner of highways, is named as director and executive administrator.

A new parks board has also been named, consisting of C. A. Davidson, chairman, Alexander Paton, and William T. Aiken, with the latter as secretary. Mr. Paton is horticulturist at Oliver Nurseries.

The Claresholm Local Press remarks: Not since 1923 has this part of Alberta experienced the depth of rainfall that has fallen during June in 1934. The precipitation for June, to the 29th, was 6.75, around two inches being recorded in one storm—some splash!

Catalogue Competition

The thing for the merchants of this community to do in their own interests is to advertise faithfully, and to make their printed announcements interesting and helpful to those whose trade and favor are desired.

Mail Order Houses and the large departmental stores of neighboring cities with their striking advertisements and catalogues are the serious competition of local merchants.

The poorest way to offset this competition is for our local merchants to remain silent. For them not to "speak up" is to give the mail order houses a better chance to get business from this community.

A WORD TO THE PUBLIC

When you send your money to a city store you enrich the great shops and impoverish this community. Strengthen—not weaken—the merchants of this community. It will all be returned to you in the form of better service and better values.

Advertisements are Interesting, Read Them

District News

From Our Own Correspondents

COWLEY HAPPENINGS

Mrs. James Smith, junior, and infant, are visiting in Calgary for a few days.

Mr. and Mrs. Watson, of Lethbridge, are guests at the home of Mr. and Mrs. Archie Swart and family. Word has been received from Bellevue that Mr. and Mrs. G. Dambols are rejoicing over the birth of a new baby girl.

G. J. Murphy, of Vancouver, and Mrs. P. Fair, of Ottawa, were visitors at the home of M. A. Murphy and family over the week end.

On July 4th, the ball teams of the district staged a three-game tournament on the Cowley diamond. First game, between Porcupine Hills and Olin Creek, was won by Porcupine Hills. Second game, Cowley lost to the River boys after a long lead in the fifth inning. Deciding play was between Porcupine Hills and the River, won by the former 8-6. Weather was ideal, and a good crowd witnessed the games. A dance was held in the evening.

On Sunday evening, Mr. and Mrs. E. Hagell, motoring from Calgary, were in collision with another car near Nanton and thrown into the ditch. Though their car was considerably damaged, they escaped with but a shaking up. Mr. Hagell did all possible to avoid the other car, which skidded on a curve.

At the closing of the Todd Creek school on Friday last, Miss Jennie Heibin, who has been occupied as teacher there for several years, gave a picnic in the afternoon at the home of Mrs. Latta, near the river, where a large crowd of young folks gathered to indulge in various sports, including races, ball games, etc. In the evening a well attended dance was held in the school house, music being furnished by local artists.

Jack Cowin brought back to Cowley from the big track meet in Blairmore on July 2nd the following winnings: sprint, \$4.00 value; 2 1/2-mile marathon, \$8.00 value and the Trono silver cup, which he is privileged to hold for one year.

Mrs. Latta has visiting her a sister from Montreal.

Miss Smith: "Frauclen Sprauler plays with a great deal of expression; but what do you think of her technique?"

Miss Greening: "I didn't notice that she wore one."

BAD LEGS VARICOSE VEINS—ULCERS

Make up your mind today that you are going to give your legs a chance to get well. No operations nor injections are necessary, no enforced rest. This simple Emerald Oil home treatment permits you to go about your business as usual—while it quickly heals old sores, reduces swellings, stimulates circulation, and makes your legs as good as new. No waiting for relief!

Just follow the simple directions—and if Emerald Oil does not give you full and complete satisfaction money back. Druggists everywhere.

Livingstone Lodge No. 22 KNIGHTS OF PYTHIAS

Meets in the Castle Hall on the Second and Fourth Fridays of the month at 8 p.m. Visitors are always welcome. Officers: C. C. A. Veprava; K. of R. & S. B. Sessler.

BLAIRMORE LODGE NO. 15 B. P. O. ELKS

Meets Second Tuesday at 8 p.m. in the Lodge Hall. Visitors made welcome. J. R. McLeod, E. R. John, A. Kerr, secretary.

HILLCREST HAPPENINGS

Mr. and Mrs. N. Miller returned from their honeymoon in Banff on Wednesday last.

Mr. and Mrs. W. Stevenson left on Sunday for the North Fork, where they intend to camp during the summer holidays.

Mr. and Mrs. W. Webster and family returned to their home in Mountain View on Saturday last.

Rev. and Mrs. John Wood moved into the Hillcrest parsonage on Saturday. Mr. Wood will have charge of the Hillcrest United church.

Mrs. C. Lecher, of Calgary, is visiting at the home of Mr. and Mrs. R. Lecher.

Among the Hillcrest visitors to Waterton on Sunday were Mr. and Mrs. G. Thornton, Mr. and Mrs. G. E. Cruickshank and Dr. and Mrs. G. B. Ross.

Donald Grant is a visitor to Edmonton.

Miss E. Strachan returned to her home in Trochu on Friday.

Miss E. Hart and Mrs. Cummings left Sunday night for Victoria.

J. Collins returned to Calgary on Friday.

Miss Bruesett, of Edmonton, was a visitor at the home of Mr. and Mrs. W. Bruesett last week.

Mr. and Mrs. W. Adlam and family are spending their vacation in Calgary.

Miss B. C. Selson is attending summer school at Edmonton.

Mr. and Mrs. James Leigh and Verdon, and Miss Doris Lowden, of Revelstoke, were visitors last week at the home of Mr. and Mrs. J. Gorton, junior.

A Chrysler left for Calgary on Friday.

Mr. and Mrs. W. Bruesett and son Teddy motored to Edmonton on Saturday.

James Marshall has been visiting friends in Calgary for a few weeks.

W. Hutchison motored to Lethbridge on Saturday, and on Sunday left for Vancouver, accompanied by Mrs. R. Stutheberry and daughter Betty.

Mr. and Mrs. P. Salt were Calgary visitors over the week end.

J. Mackie and J. Smith are camping on the North Fork.

Mr. and Mrs. C. Rhodes, of Champlain, were Hillcrest visitors last week, at the home of Mr. and Mrs. P. Stefano.

Little Miss Zelda Blackie, of Fernie, is visiting at the home of Mr. and Mrs. George Bamforth.

Mrs. H. A. McVicar was a visitor to Calgary last week.

J. Calderwood is spending his holidays in Vancouver.

Mrs. W. Robinson has been confined to her home through illness for the past few weeks.

D. Hutchison is visiting in Calgary this week.

Rev. J. Wood conducted service at the United church on Sunday evening. After the service a congregational meeting was held, at which

Mrs. R. Makin was appointed secretary-treasurer.

Mrs. Foss, of Calgary, has been visiting at the home of Mr. and Mrs. W. Fisher.

Mr. and Mrs. L. Fumagalli and daughter Mary motored to Lethbridge over the week end.

Mr. and Mrs. Fred Gregory were Lethbridge visitors last week.

The many friends of Mrs. J. Mackie are pleased to hear she is up and around again, after being confined to her bed for some months.

D. Richards returned from Calgary this week.

Mr. Square returned home from the hospital last week.

Mr. and Mrs. W. H. Moser and family were Calgary visitors last week.

Misses Margaret Grant and Irene Turner left Monday with Miss Mary Graham, of Bellevue, for Vancouver and Los Angeles. Miss Audrey Martin and Mrs. Martin left Saturday for Edmonton, where Miss Martin intends attending summer school at the University.

BELLEVUE HAPPENINGS

Mr. and Mrs. Fred Gilroy and two daughters, Freda and May, left this week to spend a vacation at Vancouver.

Mr. and Mrs. A. Watson, who have been visiting at Mr. Watson's home here, returned to California on Sunday morning.

Mrs. H. Barlas and son Jack left this week for a two months' vacation at Vancouver.

Miss Doris Chiarovano, who has been attending the Garbutt Business College at Calgary, has returned home.

Aubrey Barr, of Macleod, is visiting his sister here.

Mrs. F. Wolstenholme and Freda, accompanied by Mrs. John Shevels are spending their vacation at Victoria.

Mr. and Mrs. Charles Dambols are rejoicing over the advent of a daughter.

Mrs. W. Goodwin left by bus last week to spend a holiday in Calgary.

Mrs. Penman and family are moving into the house recently vacated by C. Woodward.

Mrs. W. Blinston has returned to Cranbrook. She was accompanied by Mr. and Mrs. C. W. Johnson and Mr. R. T. Johnson, who returned home Monday evening.

Misses B. Nicholson, M. Hallworth, M. Graham and E. McDonald are among the local teachers attending summer school at Edmonton.

The local B.Y. Scouts, under the leadership of James Radford, held a very successful lawn tea on Saturday last at Mrs. Laine's. A neat sum was realized, which goes toward the purchase of camp equipment.

A very successful party was held in the Catholic parish hall on Friday last, sponsored by the high school students, honoring the departure of one of our prominent teachers in the person of Mr. Zumwalt, who is going into a new field of employment at the Pacific coast. Willie Serra, president of the literary society, on behalf of the students, presented Mr. Zumwalt with a camera. Mr. Zumwalt, in a few well chosen words thanked the students and expressed regret at his having to leave, and in return presented Misses Francis and Dorothy Coslick with enlarged pictures of the competitors of the school track meet held the past spring. These girls obtained highest number of points in the meet. Mr. Zumwalt, in closing, wished the school every success, and said that he hoped to read next year of the Bellevue school again being winners of the shield. The best wishes of the entire school go with Mr. Zumwalt in his new field of endeavor.

Mr. and Mrs. J. Longworth and son Jackie left on Saturday for a two weeks' vacation at Vancouver.

A very quiet wedding was solemnized at the home of the bride on Friday evening last, when Miss Anne Penman became the wife of Mr. William Cousins, only son of Mr. and Mrs. G. W. Cousins here. The happy couple left on Saturday's train for

EDDIE, THE AD MAN

"I HATE IT JUST THOUGHT UP A WISE CRACK. I'D GO BEHIND THE SMALL BOYS' DEFINITION. 'SALT IS WHAT MAKES THINGS TASTE BAD WHEN YOU PUT IT ON ANY ONE.' HEAR THE NEW ONE, 'ADVERTISING IS WHAT PUTS BUSINESS ON THE BUM WHEN YOU DON'T DO ANY.' NOT BAD, EH?"

Big Canadian Firm Celebrates Diamond Jubilee

Founded by George and Mathew Beatty on June 18, 1874 and with agencies, warehouses, offices or depots across Canada, in New Zealand, the United Kingdom and fifty other countries, the well-known national and world-wide exporting house of Beatty Bros., manufacturers of washing machines and farm implements, celebrated its diamond jubilee at Fergus, Ontario, location of the head office of the firm, this month. A Canadian Pacific special train brought 200 agents from all over Canada, including two from Great Britain, to take part in the demonstration. An interesting program was thoroughly appreciated and enjoyed.

Lay-out shows arrival of the special at Fergus with insets of W. G. Beatty and M. J. Beatty, respectively president and vice-president of the firm.

ly for Victoria, where Mrs. Cole hopes to reside permanently. The evening was spent in whist, singing and dancing. After a dainty luncheon, Mrs. Beal, on behalf of those present, presented Mrs. Cole with a dark brown aeroplane case. In making the presentation, Mrs. Beal expressed regret at Mrs. Cole's proposed departure. The party broke up about 1:30 a.m., with the singing of "For She's a Jolly Good Fellow," and wishing Mrs. Cole God-speed.

The appointment of Mr. O. S. Longman, B.S.A., to the position of field crops commissioner for Alberta has been announced. He succeeds L. I. Gray, who has become deputy minister of municipal affairs. Mr. Longman was formerly principal of the Raymond school of agriculture.

Longman, B.S.A., to the position of field crops commissioner for Alberta has been announced. He succeeds L. I. Gray, who has become deputy minister of municipal affairs. Mr. Longman was formerly principal of the Raymond school of agriculture.

WEIGH THE VALUE

Make THESE TESTS yourself

- SLAM THE DOOR!**
No weak, ratty rattle when you close the doors of a new Chevrolet!
- POUND THE BODY!**
Fisher puts in more materials... therefore, no shudder or shiver under the blow!
- TEST THE ROOF!**
You'll find a firm, unyielding, bow-and-stay structure... not flimsy wire netting!
- TRY THE RIDE!**
A smooth, steady, level glide... thanks to Kneebone action and extra balanced weight!

Ready for immediate delivery.
Master Six from \$844 Standard Six from \$710

WORLD HAPPENINGS BRIEFLY TOLD

New motor cars on the roads of the United Kingdom in March numbered 43,735 as compared with 33,748 in March, 1933.

Charles S. Thomas, 84, who capped a stormy career as United States senator and governor of Colorado by defying President Roosevelt's 1933 order against gold hoarding, is dead.

Canada's greetings were extended to the Prince of Wales on the occasion of his birthday, June 23, by the Governor-General, the Earl of Bessborough.

Henry Lawson Royle, 16, attempting his first flight, at Herby airport, Yorkshire, crashed and was burned to death 10 minutes after the take-off.

Dr. Wm. Boyd, professor of pathology in the University of California, has accepted a similar position in Stanford University, California. It was announced. He will leave Winnipeg late in August.

The International Institute of Agriculture estimated that the drought will cause European wheat harvest this year to fall short of 1933 by 260,000,000 bushels. The 1934 harvest is expected to total 1,470,000,000 bushels.

Rt. Rev. Ernest William Barnes, Bishop of Birmingham, declared at a peace service in London, that Great Britain should disarm even though she is alone against powers in doing so. Any alternative policy, he argued, might lead to war.

The Rotarians, 10,000 of them, were welcomed to Detroit. Representing 80 nations and nearly as many languages, the political phylloxy, they assembled for the 29th convention of Rotary International.

Nowak Kazimierz, Polish newspaperman, who left Warsaw many years ago to get material for a book, has arrived at Cape Town after peddling across Europe and down the length of Africa on a bicycle.

Chinese Were Acquitted

Alleged Lottery Tickets Were Poems
By Confucius

Poems written by the great Chinese philosopher, Confucius, cannot, by any stretch of the imagination, be classed as lottery tickets. Judge Lacroix ruled when he dismissed thirteen actions against as many Montreal Chinese for operating lotteries.

Police had recounted how they had purchased slips of paper containing Chinese characters and had been informed that a drawing would take place on certain dates. The slips, they stated, were lottery tickets.

"Are you certain these are lottery tickets?" Charles Codrington, defence attorney, asked the witnesses, who responded affirmatively.

The slips were turned over to a Chinese scholar, who examined them and announced with a smile that they were fragments from the poems of Confucius.

In rendering judgment, Judge Lacroix pointed out that three essentials were necessary to establish a lottery, the ticket, the prize and the drawing. There was no evidence of a ticket, none of a prize and none of a drawing. Judge Lacroix ruled in dismissing the action.

Never Shows Correct Time

Silesian City Clock Has Been Fast For 650 Years

Goritz claims a distinction which is probably unique. A clock in this ancient Silesian city has not shown correct time for over 650 years. In 1353 a conspiracy was formed to murder the councillors as they left the town hall at noon. Conscience, however, overtook one of the conspirators, and he put the clock forward seven minutes. As a result, the would-be assassins arrived on the scene too early and were arrested by the watch. To-day the clock is still kept seven minutes fast in memory of the councillors' escape.

Through With Speed Flying
Capt. Frank Hawke, famous aviator, on a visit to Detroit, revealed that he is through breaking airplane speed records. "Speed flying is circus stuff now," he explained. "Safe flying is the real job confronting 'air pilots'." Capt. Hawke has been in China in the interests of American aircraft company. He was in Detroit to take delivery of a new aerodynamic automobile.

Java is one of the most thickly populated places in the world; 40,000,000 people occupy its less than 80,000 square miles.

Set Up Laboratories

On Mountain Peaks

Scientists With Opposing Views Will Study Cosmic Rays

Two Colorado mountain peaks towering more than 14,000 feet above sea level, have been chosen as laboratories for two groups of famous scientists for the study of the much-discussed cosmic rays.

Dr. Joyce C. Stearns of Denver, R. D. Bennett of Massachusetts Institute of Technology, and Doris K. Bowman of McDonald College, Canada, will conduct experiments atop Mount Evans in the Denver mountain park.

Dr. Robert A. Millikan of Pasadena, whose theories regarding the cosmic rays are in many respects opposed to those of Dr. Bennett and his associates, will set up his equipment on top of Pike's Peak, near Colorado Springs.

Trained Engineers Needed

Good News For Graduates Of School Of Mines

There never has been a time in history when the need for highly trained technical engineers has been greater than now. Former United States Senator Tasker L. Odde of Nevada told members of the 1934 graduating class of the Colorado School of Mines.

"World competition," he said, "is growing more keen in the production of the metals especially, and the balance of success will go to that country whose technical progress in the field of invention and improved methods of treatment has made the greatest advancement."

ASSISTING NATURE

By JACK MINER

During the past year I have read a number of articles, both in magazines and in newspapers, as well as many letters that have come to me, on the subject of "Nature Balance," decrying actions or systems on the part of man which the writers described as "interfering with Nature," "upsetting Nature's balance," and so on.

To all who adopt that attitude I should like to put myself on record to the effect that, personally, I believe the so-called "balancing" of Nature was left entirely with man, and that I believe in assisting Nature for the benefit of humanity. God created everything—everything and then He created man "in His own likeness" and gave him dominion over all that is, as I understand it, the power and authority to manage everything here on earth.

Look, for instance, at the animal world, with the livestock in the farmer's barnyard as example. Did God create the Jersey cow, and the Holstein, and the Hereford? No. He gave them the original stock and then God, through man's instrumentality, developed many breeds, some for the high cream content of their milk, some to produce the greatest quantity of milk, and some as the best beef cattle. All have been on the earth a long time, of course; but their differences are the result of man's management. And, remember, man had to interfere with Nature to develop them.

Much the same thing is true of the horse, different strains being cultivated for particular purposes, such as the Clydesdale and Percheron for heavy draught work, and the blue-blooded descendants of original Arab stock for racing.

Recently I was in some of the southern United States, where the character of the farm work to be done is too heavy for the common ass, yet where the climate is too warm to permit of the horse doing its best. In that part of the continent, therefore, man has crossed the ass with our common horse and produced a beast that withstands the heat and is also strong enough to do the work of tilling the soil. Yes, he has developed the mule. But the mule kicked and, so far as I know, has gone no farther.

In equity, if you trace back the various species it is very easy to see that it has been the work of man that has developed the different breeds—Leghorns, Brahmas, Minorcas, Plymouth Rocks, and so on—some of which are especially valued as layers, and others as food. Our much-prized turkey is nothing more nor less than the wild turkey, domesticated and improved.

Seventy-five years ago our Canadian North-west was grazed by millions of wild buffaloes (Bison). Then came the white man who, realizing the value of the fertile soil, established a park where a herd was placed to preserve the species from extinction, slaughtered the great roaming herds, and turning the land upside-down, made it into one of the largest and most valuable of our game and wheat-raising provinces. Cities and state governmental buildings dotted here and there across its

ing you. Yet (if they were consistent in their argument) these people would have to maintain that in doing so you were "upsetting Nature's balance," since God created all these creatures at the same time. Or how about the fly, carrier of typhoid? Do you control it or, preferring not to disturb "Nature's own," let it live? Personally, I am glad He gave man "dominion over all" these things.

Indeed, one is moved to ask the question: What would our animal world, our farms and orchards and gardens—our whole world—be like if man had not assisted Nature? Yet the very minute the white man discovered this continent, came ashore, cut down a tree and began to develop North America into a garden for hundreds of millions of people, that man, according to some, disturbed the balance of Nature.

As I write, I thank God for all He made—for the raw materials He gave us with which to work: that He made us in His own likeness, after His own image, and endowed us with sufficient brains to develop those raw materials and keep on discovering and bringing within reach of us all the blessings He created. To illustrate my meaning, allow me to quote the poem, "Making a Garden," written by Ida M. Thomas:

Man ploughs and plants and digs and weeds,
He works with hoe and spade;
God sends the sun and rain and air,
And thus a garden's made.
He must be proud who tills the soil
And turns the heavy sod;
How wonderful a thing to be
In partnership with God!

I say, He wants all of us to be partners.

Little Journeys In Science

THE ICE AGES

(By Gordon H. Guest, M.A.)

Niagara Falls and the Great Lakes, vacation paradise to many from the western plains, are legacies left to us from the last great ice age, which enveloped this continent many thousands of years ago. Once looked upon as great catastrophes because they destroyed life and defaced the earth's surface, the ice ages are now considered by geologists to have been not entirely destructive.

It is thought that there have been four "ages of ice" in the geological history of the world, each lasting for many thousands of years, and bringing about great changes in the earth's surface. The last ice age is believed to have covered about 12,000,000 square miles, and of this, 6,000,000 square miles is still under ice. It is notable, however, that the world was never entirely covered with ice at one time, and thus life was always preserved, to spread again when the ice disappeared.

Geologists refer to an ice age, as a time when ice encrusts large areas of the earth's surface and all forms of life in these regions become extinct. The condition is brought about by "ice caps," huge blocks of ice formed by piles of snow which partially melt, congealing to form ice, and slowly spreading farther and farther.

It is believed that it was in the melting of these great ice caps that the Great Lakes and Niagara Falls were formed, the peculiar rocky and uneven nature of the earth's surface retaining the water as it melted.

The hemlock tree is not poisonous, the "hemlock" poison made famous by Socrates being derived from a plant similar to the wild carrot and containing poison in root, stem, leaf and seed.

A woman's intuition is more powerful than a man's knowledge.

SUNDAY SCHOOL LESSON

JULY 8

ASA RELIES ON GOD

Golden Text: "The Lord is my helper; I will not fear: What shall man do unto me?" Hebrews 13:6.
Lesson: II. Chronicles, Chapter 24:1-16.

Devotional Reading: Psalm 24:1-5.

Explanations and Comments

The Prophet Azariah's Counsel, 2 Ch. 15:1-7. The Spirit of God came upon the prophet Azariah, the son of Obed, in Old Testament times; the word spirit refers to God's power. As Azariah, the king of Judah, was returning victorious from his engagement with Zerah, the Ethiopian (14:9-15), Azariah went out to meet him. Instead of greeting him with words of congratulation and praise, he solemnly warned him that he must remain loyal to God: "Hear ye me, Assa," he said, "and Judah, and Benjamin (the tribes over which Assa was king): Jehovah is with you, while ye are with him; and if we seek him he will be found of you; but if ye forsake him, he will forsake you." He told them plainly upon what terms they stood with God. Let them not think that, having obtained the victory, all was their own forever; no, he must let them know they were upon their good behavior. Let them realize when we read that Mesiah, otherwise not (Matthew Henry). Compare David's counsel to Solomon, 1 Ch. 28:9.

Assa's Reforms, 15:8. Encouraged by Azariah's words (probably the words (Azariah the son of Obed) had taken (2 Ch. 13:19) from the tribe of Ephraim. How much such a reformation was needed we realize when we read that Mesiah, the queen mother, had erected an image of Ashtar in Jerusalem. Assa had the image ground to dust and buried in the Valley of the Widron, and he deposed the queen. Assa rebuilt the altar of burnt offerings which had been erected before the temple sixty years earlier.

Recipes For This Week

(By Betty Barclay)

SUMMER LEMONADE

- 6 lemons
- 1 cup sugar
- 6 cups cold water
- Lemon slices.

Extract lemon juice, add sugar, and stir until dissolved. Then add water and serve immediately, pouring into glasses over crushed ice (not too much ice for children). Place a lemon slice over the rim of each glass. By dissolving the sugar in the lemon juice before adding the water you will acquire the real "knack" of lemonade making.

CORN FLAKE PASTRY

- 1 cup corn flake crumbs
- 2 tablespoons butter
- 2 tablespoons sugar

Put the corn flakes (4 cups full) through a food grinder, using the fine cutter. Then sift the crumbs. Measure crumbs into sifter. Cream the butter with the sugar and add the crumbs, kneading thoroughly. Press into the bottom of mold, or a pie pan.

Man has done more in the last 5,000 years to alter the earth's surface than Nature has done in five million years.

About 14,000 persons made contributions to finance Admiral Byrd's present trip to the South Pole.

For EASIER Dyeing

The new INSTANT L is easier to use than any other tint or dye you ever used. It dissolves completely in 40 seconds.

It makes a brilliant, even, and lasts and lasts and lasts.

YOU'VE BETTER LUCK

WITH

NEW!

No longer a soap! Dissolves instantly.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hov and Peter Annon, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Minton, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing over them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartless, goes to the studio for quiet and to think—Peter and Avis follow later, and as the lights are turned on, the statue which has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

(Now Go On With The Story)

CHAPTER I.

Avis was one of the first visitors at the museum when the exhibit opened the following week. Her eager, anxious inspection of the vast gallery filled with sculptured pieces might have indicated that she was one of the most ambitious of the entrants. Her eyes scanned one side of the room hurriedly, darted to the other end. Even at that brief interval of suspense, her face glowed heavily with the dread of disappointment, before her eyes found that object for which they were searching impatiently.

Yes, there it was. Peter's "Land of Hope" had made the exhibit. It had been accepted for display with the best by the selecting committee. She crossed the room quickly to examine the card which hung from the model group. The data was accurate. There would be another week of suspense before the final award of the scholarship prize. She must help Peter to endure it, somehow. Of course, she hadn't much hope now for Peter's chance of the reward. She was only happy for him that his piece had been accepted. That should encourage him.

Besides, she now had an alternative to her first plans involving his removal to Paris. How fortunate that she had thought of suggesting that Peter could do some work for her to meet his loan from her. Had she made the suggestion now, he might have suspected that her pity prompted the plan. As it was, she

Ask Mother—She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was nervous and rundown. . . kept her on the job all through the Change. No wonder she recommends it.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

W. N. U. 2053

already had arranged for his services if he did not go to Paris.

The idea presented two advantages: instead of relieving him of his indebtedness to her, it would practically double his obligation to her, in the light of gratitude. Not only would Peter feel obligated to her for the timely loan of money, but for the opportunity to repay it with his own work. She also would see that enough admiring friends placed orders to add considerably to that obligation. So, she still held the advantage—even without Paris. That would be but a simple step when she had won Peter completely.

Paris, Rome, Athens—everything would be theirs to command; then, her thoughts merged into the present tense, so confident was she of the future.

So engrossed was she in her plans that she almost collided with Peter in the corridor as she was leaving the exhibit room.

"Peter!" she exclaimed, "it's in!" not even granting him the thrill of discovering it for himself.

"Is it?" the gleam which lighted his eyes betrayed his calm. "I'm surprised."

"Oh, I'm not. It is a marvelous thing, but—"

"I know. You might as well say it has no chance with the others."

"Why, no," she denied. "Would you believe it, I have been in there for 10 minutes looking at that piece that I have seen dozens of times before, and I didn't even notice the other entries?"

He grinned boyishly. "You are prejudiced, madam. You would make a fine judge, now, wouldn't you? Come back with me, and we'll see what else there is to see."

As if she would refuse! She cared nothing about comparing the talents of her contemporaries, but just to walk beside Peter anywhere, to share anything with him, was sheer delight and an adventure.

She led him to his own work and he read with a strange rush of excitement the prosaic words of information on the classification card. Ostensibly, it was not important; but to Peter it represented a goal toward which he had been striving for four long, arduous years. He had not intended that it would be just like this, but at least, his work had met with the approval of the judges well enough to be in the display. It was a small personal triumph, which portended much more than appeared on the surface. He had not worked in vain.

For a moment he forgot that he was not alone, so far did he withdraw into his own secret thoughts. Avis, the room, and the other occupants, the scores of plaster figures all about him, receded into space; and he was alone with his little moment of personal triumph.

Camilla was the first to intrude into that sanctuary of his thoughts, and it was almost as if he would speak with her that he turned toward Avis. Thus abruptly returned to the time, place and reality, his face clouded for an instant, like the sun is dimmed by the sudden passing of a small white cloud.

His comment was changed to, "Well, it's there!" with a long sigh of near-satisfaction. "Now let's see what argues with it." His critical eyes roved over the room. "Shall we try to pick the winner?"

They returned about the room, commenting, admiring, criticizing. Avis favored only the symbolic figures such as Peter had prepared to enter. But Peter admired an excellent bust of the city's leading citizen, Andrew Havelock.

"It's absolutely marvelous," he declared. "I've not only seen pictures of him, but I've seen Havelock himself, talked with him. It is the truest likeness of a human being that I've ever seen in plaster." He turned around. "That sea gull with spread wings is a beauty, too; every line is rhythm and motion, but I doubt if it has a chance against this bust. I don't think there is a nude figure here that can compare with either of them."

"Then what about 'Land of Hope'?" she reminded him.

"Oh—that! It's completely out of the running. I'm going back to work, in earnest. At least, this much has inspired me. By the way are you in any hurry for your stuff?"

"Not if you have something more important to do. I can wait."

"Not at all. I just want to know where to begin. I'm at your service, if you say so."

"I do say so!" she declared. "How about coming to tea at the house tomorrow and consulting with mother about the garden piece first. You can get them modeled and while doing the same work you can fill in on any things at the studio."

"Fine!" he agreed. "You're a great planner, aren't you?"

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernst's Powder, largest seller in world—holds plate so tight they can't annoy you so comfortably they actually feel and act like your own. Keep mouth sanitary, breath pleasant, special comfort—double protection sensitive gums from getting raw. Small cost—any drugstore.

"Plans are only great if they work out to the proper advantage."

"And what is that advantage?"

"Your success. It all depends on you," she replied, with more significance than he knew.

"That suits me."

They were standing outside now, beside her smart coupe, parked at the curb. "I'll drop you at the studio," she suggested.

"Thanks a lot. But I'd rather walk to help work out some of this newly acquired enthusiasm. Too much at one time is bad for the mental balance. Did you ever feel giddy with inspiration? Well, that is my present condition," he grinned. "Besides, I want to drop in somewhere right away and phone Camilla the good news. She will be anxious to hear. I promised to let her know as soon as possible."

Avia set her teeth hard over his loyalty to Camilla. It had not wavered since that first moment on the night of the tragedy. Nor had he dared mention to him the incident, even to learn what his reactions had been, or what they had said to each other. There are some forbidden places into which even the most audacious and unscrupulous may not enter. She would just have to be patient and await the outcome. Her campaign was now prolonged and confronted with added difficulties. But she was a good warrior who never admitted defeat.

"Well, so long," she waved gaily, and darted away with a roar of the powerful motor.

Camilla was jubilant over Peter's announcement. "I knew it would get in," she told him. "Congratulations, darling. I have a little special dinner all prepared to celebrate tonight. Be there at six, will you?"

"Okay, sweetheart. But you took a pretty long chance getting that celebration ready before the victory, didn't you?"

"I disagree. It was a sure thing. But even so, a celebration was in order. It's quite an event to have you for a dinner guest, even."

He laughed. "You won't think it's an event when you have to face me across the dinner table every day for the rest of your life," he warned.

"It won't be. It will be—paradise," she declared.

(To Be Continued)

A new type anchor, having only one point and no crossbar, invented in England, has at least twice the pulling power, in proportion to weight, of any anchor now used on ships.

An eight-year-old battle between a young maple and a pine tree at Valdosta, Georgia, has resulted in the roots of the maple strangling the old pine to death.

Putting into circulation one kindly truth about some other fellow is a fine day's work.

HUGE TELESCOPE DONATED TO ROYAL OBSERVATORY

The new \$60,000 telescope recently presented to the Royal Observatory, Greenwich, is shown above being adjusted. It is the most powerful reflecting telescope ever installed at Greenwich and astronomers at the Observatory were so eager to bring it into immediate service that they were using it for several weeks before its formal presentation by the donor, Mr. W. J. Yapp.

Sink Great Shaft

Would Bore Deep Hole In Earth To Tap Unlimited Power

The boring of a great hole into the earth, with all mankind lending a hand to the job, was suggested before the American Association for the Advancement of Science in a paper prepared by the late Dr. C. E. Grunsky, president of the California Academy of Sciences.

The paper was read by Dr. F. N. McFarland, vice-president of the California academy, who succeeded Grunsky upon the latter's death June 9.

Dr. Grunsky's thesis said if mankind would sink the great shaft as far as human ingenuity would permit, the results would fully repay the effort.

The centre of the earth is a great reservoir of power, if it could be tapped, gaseous pressures of 900,000 pounds a square inch would be the reward.

Dr. Grunsky did not conceive that man could burrow down very closely to the central core of the globe but suggested a great co-operative effort would result in penetrating the outer crusts to a vastly greater depth than ever before—depths he thinks could be reached which would tell science many valuable things.

THE RHYMING OPTIMIST

By Aline Michaelis

TWO YEARS OLD

With eyes like heaven
And hair of gold,
This joy is given.
Now two years old!

When have we caught this
Flower, this song?
Who would have thought bliss
Could last so long?

Here is beguiling,
Embossed mirth,
Like April smiling,
No taint of care!

This trust is given
For us to hold:
Eyes dear as heaven,
Heart pure as gold!

Another Useless Invention

Cellophane Lining For Bathtub To Eliminate Rings

"No more rings around the family bathtub."

This is the promise held out by Robert I. Inala, Long Wharf ship model maker, who, in spite of the handicap of having a crippled arm, has patented an invention which should do much in the way of preventing domestic discord arising from those rings which add nothing to a bathtub's beauty.

The invention consists of a specially treated waterproof cellophane lining which can be instantly loosened from the inside of the bathtub by means of a rig-cord when the bath is through.

The wireless telephone station at Mexico City is equipped to communicate with all countries of the world.

Even small towns and rural districts in South Africa are feeling the prosperity wave.

Agricultural Notes

Many Items Of Interest To The Western Farmer

For the first time in two years, fresh beef is again being imported into Japan from Canada.

The complete storage capacity of Canadian county and terminal elevators, public and private combined, is about 418,000,000 bushels.

The progressive sales of branded beef in Canada are clearly shown by the following figures: (1931) 17,240,748 pounds; (1932) 21,748,768 pounds; and (1933) 30,682,609 pounds.

Once the stem of an elm tree has been attacked by Dutch elm disease which has broken out in the United States, nothing can be done to save the tree.

The history of agriculture in Western Canada is comparatively brief, and previous to the last 50 years was practically confined to Manitoba.

Canada moved upon from seventh to fourth place among Great Britain's sources of imported bacon in 1933, and, excepting the Irish Free State, represented the only appreciable source of Empire supply.

While oats form the principal and most important cereal crop for livestock feeding, oat hulls are very poor feeding and indigestible, containing only about 3 per cent. protein and over 30 per cent. fibre.

The Feeding Stuffs Act states that in meat products in which the phosphoric acid content exceeds 10 per cent, the word "bone" must appear in the description, thus, "Digest meat and bone tannage." "Meat and bone meal."

Before the 1930 revision of the Grain Act, it was possible to have approximately 2,000 different classifications of Western Canadian grain, under the classifications then in use.

Next to wool, wheat is the greatest of Australia's primary industries. Each year approximately 225,000 range lambs go into the feed lot in the provinces of Saskatchewan, Alberta, and British Columbia. At time of sale from the range, these lambs average approximately 65 pounds and when finished for market they weigh from 90 to 100 lbs.

What the Co-operative Committee, composed of representatives of the Dominion Experimental Farms System, the Ontario Agricultural College, and Macdonald College, St. Anne de Bellevue, are doing in the study of the pasturage problem is another example of the value of co-operative approach to an important problem of vital concern to the farmer.

A peculiar form of irrigation is practised in some parts of northern Sind in India where the soil is retentive. It is known as "boil." The soil lands are heavily flooded up to a foot or so in depth when water is available in the hot weather. The land is well cultivated as soon as the bullocks can walk on it and good crops are obtained.

Agricultural engineering research embraces three distinct fields of investigation: (1) mechanical farm equipment, used for production, processing crops and the handling of livestock products; (2) farm structures, including the farm dwellings and buildings for the storage of crops and the handling of livestock; and (3) land development, comprising both reclamation of unimproved land and improvement of existing farms for profitable agriculture.

Was Bank Teller

Mitchell F. Hepburn Started Career In Bank At Winnipeg

Twenty-one years ago a 17-year-old youth from St. Thomas, Ont., reported to the western head office of the Canadian Bank of Commerce with a letter of introduction. He had come in response to a summons for young clerks to staff bank branches being opened in rapidly-developing prairie communities.

The youth was Mitchell F. Hepburn. The bank official apparently recognized him as exceptionally able and he was made teller in a downtown branch of the bank in Winnipeg.

Within a few months he was transferred to Port Stanley, Ont. To-day he is the premier of Ontario.

"Death sentence does not deter crime," says a headline. Well, those who receive it may not be deterred, but they're interested, and it amounts to the same thing.

A 220-foot nonrigid blimp was the first lighter-than-air craft to be based at Moffett field, new \$5,000,000 naval air base at Sunnyvale, California.

Making a noise is one of the leading infant industries.

LINIMENT

Little Helps For This Week

"I would have you without carefulness." 1. Corinthians 7:32.

O Lord, how happy should we be if we could cast our care on Thee, if we could say: Never brood over thyself, And feel at heart that One above, In perfect wisdom, perfect love, Is working for the best.

Cast all thy care on God. See that all thy cares be such as thou canst cast on God, and then hold none back. Never brood over thyself, never stop short in thyself, but cast everything, even this very care which distresseth thee upon God. Be not anxious about little things if thou wouldst learn to trust Him with thine all. Act upon faith in little things. Commit thy daily cares and anxieties to Him, and He will strengthen thy faith for greater trials. Rather give thyself into God's hands, and so trust Him to take care of thee in all lesser things as being this, for His own sake, whose thou art.—E. B. Pusey.

Seems To Be Unwise

Manchester Guardian Comments On

World Destruction Of Food

In any case, to an economist from some other world, the whole wave of restriction—that is the deliberate destruction of food and raw materials—whether under the direction of Mr. Bruce or of Mr. Elliot or of Mr. Roosevelt, would appear fantastic. In nearly every country during the past few years, in the name of good standards or balanced budgets, the standard of living of the mass of the people has been steadily forced down. Even in the pre-quota era in Great Britain signs of malnutrition among children were not lacking. Do we then encourage the farms of the New World to send us cheap bread, butter, and meat? No, we invite them to destroy it. The word has gone forth that cheap food is a curse.—Manchester Guardian.

Folk Song Director

George Hassan, Known To Ukrainians Throughout Canada, Is Ill

Ukrainians throughout Canada will be grieved to learn of the serious illness of George Hassan, so well known to many others as well as his own countrymen, for the folk-song choruses he has trained in all parts of the Dominion.

Mr. Hassan was one of the members of the famous Koschek choir which toured the capitals of Europe for six years. He has been a great inspiration to the Ukrainians in Canada. His last public appearance was in Kingston in March. He is in St. Joseph's hospital.

Mr. Hassan is a graduate of the Royal Agricultural College of Canada. For a time he farmed near Hamilton.

Girl Lawyers From India

Two girls from India have taken up law in London. Miss Battwalla, a young Parsee, is practicing as a barrister, and has just handled a divorce case before Sir Boyd Merriman. She comes from a lawyer family in Bombay, speaks English fluently and appears in her native costume, a purple sari.

The Canadian Shield

The central part of Canada is underlain by a great expanse of very ancient, hard crystalline rock known to geologists as the Canadian shield. This has an area of about 2,000,000 square miles, or more than half that of the whole Dominion.

Talk is cheap—otherwise some people would be bankrupt.

Power Shelves with HANDI-ROLL

A pink tea, giggle, gabble, gobble, gill—Oliver Wendell Holmes.

Mrs. H. Gibeau visited her daughter, Mrs. C. Reddick, at Kimberley over the week end.

An exchange says: Never run after a street car or a woman. Another will be along any minute.

The Calgary exhibition and stampede opens on Monday next, with the usual parade and demonstrations.

Mr. and Mrs. Albert Krywolt and J. P. O'Neill were visitors last week end to Canal Flats and Invermere.

The Rex Cafe, operated by Chinamen, won the prize for the most patriotic window decorations on Dominion Day.

Len Watkins, formerly of the Coleman vendor store, has been given charge of the new liquor store at High River.

Announcement is made of the transfer of Inspector K. Duncan, R.C.M. Police, from Lethbridge to Banff. Inspector Bruce, of Banff, moves to Lethbridge.

The question was repeatedly asked at the sports ground on Monday as to who was the prominent Blaimore individual who crawled through the fence to see the sports, rather than pay a 35-cent admission fee at the gate.

Mrs. J. Lote has been appointed to the telephone central at Cowley.

Mrs. Sam Patterson's daughter, of Vancouver, is visiting her mother here.

The Okotoks board of trade will award prizes to owners of best kept lawns and gardens this year.

For the month of June, the Banff Springs hotel topped its record with the largest registration in its history.

The sign at Pozzi's Lumber Yard was newly painted this week by J. "Lucky" Lieskovsky, of Blaimore.

LOST—Wheel Hub-Cap from Studebaker car, with letter "S". Finder please leave same at The Enterprise office and receive reward.

Mr. and Mrs. Marshall Hamilton left last week end for Medicine Hat, from which point Mrs. Hamilton will proceed east to visit her former home in Nova Scotia.

At the recent examination, held in the Marquis hotel, Lethbridge, Misses Moira Mansell and Mary Jackson, of Corbin, passed with honors. These promising girls were the only pupils entered by Mrs. Thomas Gaskell.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, etc. Phone items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

F. E. Harrison, fair wage commissioner, was in town yesterday.

Mr. and Mrs. Ted Elliott, of Chapman Camp, were visitors here during the week.

Alexander Roderick McLeod, of Mercoal, has been appointed justice of the peace.

Angus Morrison, secretary of District 18 of the United Mine Workers of America, is a visitor to The Pass.

Even the influence of the M.W.U. showed little effect against the sports in Blaimore. Try again, Red element!

The Carnera-Baer fight pictures will be shown at Cole's theatres, Bellevue and Hillcrest, on Tuesday and Wednesday next.

An exchange remarks: Why teach children to read the papers and then fill them with all the details of the Brownlee-MacMillan case?

Mr. and Mrs. Sidney White are leaving this week end on their annual vacation trip by motor, during which they hope to visit his mother, Mrs. George Wilson.

Far too many parents are not on spanking terms with their children—as evidenced by the foundation side-walls of the local school the day after holidays were declared.

J. E. Gillis, B.A., has tendered his resignation as police magistrate, which position he has filled for the past few months. Mr. Gresham has returned to the job, and Mr. Gillis has again reopened his law office at the corner of Victoria Street and Eighth Avenue.

Mr. and Mrs. James T. Leigh and daughter Verdon sail from Montreal tomorrow on the Duchess of Atholl for England, where they will remain for the next two years, while Miss Leigh, who won a scholarship at the Royal College of Music, continues her musical studies.

Excellent provision for shower baths, with ample supply of hot and cold water, has been made by Mr. Robbins at the Blaimore tourist campsite. Other improvements lately effected tend to make the local camp one of the best along the chartered gravelled highway.

For the second time in as many weeks, Bill Duncan hooked a whale near Burnis yesterday afternoon. Sections of his bamboo rod were picked up near Medicine Hat this morning, while the reel and other important parts of the tackle were found at Waterton Lakes and the Highwood River.

Mr. and Mrs. Charles Cartwright, of Blaimore, announce the engagement of their second daughter, Lillian Alberta, to John Chester, youngest son of the late Mr. John and Mrs. Price, of Coleman, the marriage to take place in July. Miss Cartwright has been a member of the local telephone staff for the past four years.

Remember the Castle River Club stampede and sports to be held on their athletic grounds at the South Fork, near the bridge on the Burnis-Beaver Mines trail. Distance from Burnis about four miles, from Lundbreck six miles, from Cowley seven and from Pincher Creek eleven miles. Ideal opportunity for an outing. If you wish, there is good fishing in the vicinity, but don't miss the stampede.

Dr. Stewart, to Bill McVey: "Any scars on you?"

Bill: "No, sir, but I have got some cigarettes if you would like one."

Mother, to son sliding down the banisters: "What are you doing there, Cyril?"

Cyril: "Making trousers for poor orphan boys, mummy."

WHY PUBLISH A WEEKLY NEWSPAPER?

Perhaps we sometimes wonder what earthly good a weekly newspaper really is, and no doubt many of us who try to run them, to the best of our abilities, often wonder too. Does it accomplish anything in the community outside of earning a meagre living for the publisher? If not it had far better cease publication. The truth of the matter is that the reason for publishing a weekly newspaper, or any other newspaper, is because people demand it. People want to be in as close touch as possible with world conditions, and along with other developments which have taken place along the ages there has been a demand for closer unity and co-operation which could only be realized through the medium of the newspaper. The weekly editor does not write an editorial, feeling it to be the expression of superior knowledge or intelligence. In this community he has a duty to perform, and that is to study conditions, to be an inveterate reader, to sift evidence pro and con, and give to his readers a tolerant viewpoint of things as he sees them. This is his bounden duty, and if he neglects it, he is not accepting the full responsibility of his calling.

Publicity is required. In promotion work your local paper takes the leading part. It is ever the champion of worthy causes and philanthropic and patriotic undertakings. But to function properly, and fully carry out its natural prerogatives, it must in turn have the financial support of the community it serves.—Alliance Times.

Leonard McDonald, of the Safeway Stores, Calgary, was a visitor at his home here over the week end.

Teddy Thael, young son of Mr. and Mrs. Fred Thael, won highest marks in Grade XII in the Macleod school.

Mr. and Mrs. E. J. Tompkins, accompanied by Helen and Jack, left on Monday on a motor vacation to points in Washington and the Pacific Coast.

As we go to press, we learn that J. A. (Doc) Barbour has sold his pharmacy business at Bellevue to Mr. Idria Hayson, of Coleman, the transfer now being arranged.

A hole in one was made by an Alberta golfer on Dominion Day. The guy who placed the ball in the hole in the early morning hours received a bottle of Scotch for his kind act.

Richard, Enas and A'ez George, Indian brothers, were sentenced to hang on October 26th at Oakalla jail for the murder of Dominion Indian department Constable F. H. Gibson near Merritt, B.C., on May the 23rd.

The sudden finish of the main bout in the boxing programme on Monday night came as a great surprise to a record house of fans. Kwiczak, of Drumheller, lasted less than 4½ minutes against the clever work of Lust, of Medicine Hat. In the semi-final, Volney, of Newcastle, was awarded a draw against Kid Winters, of Michel. A fast preliminary was staged between J. Verquin, of Cowley, and young Russell, of Coleman, Verquin being awarded the decision on points.

EYES EXAMINED at the Blaimore Pharmacy on Saturday afternoon, June 30th, E. J. ANDERSON, B.Sc., in attendance. Free demonstration of the new Amplified Acoustic Aid to hearing.
